### **Greater Egypt Introduction**

- Tyler Carpenter with Greater Egypt briefly reviewed topics covered in previous meetings for the Kinkaid Creek Watershed-based Plan.
- Detailed information regarding the watershed – based plan can be found in the Kinkaid Creek Inventory and Assessment found on our website:
  - <http://greateregypt.org/kinkaid-creek-watershed-based-plan/>

### **Kinkaid Creek Watershed Planning**

- Review of previous meetings
- Completed Elements
  - Element A – Identification of causes of impairment and pollutant sources that need to be controlled to achieve load reductions identified in watershed plan
  - Element B– An estimate of the load reductions expected from management measures.
- Remaining Elements

- Element C: Describe management measures that will achieve load reductions and targeted critical areas
  - The BMP process was explained to members
  - The plan will need to include watershed-wide and site-specific measures
- Element D: Technical and Financial Assistance
- Members will have until the next meeting to submit BMP proposals
  - Greater Egypt will map and model load reductions for each management measure
- Element E: Education and Outreach
- Element F – I: Implementation and Monitoring Strategy
- Needs from Committee / Meeting Schedule

#### Future Meetings

- ✓ Watershed Planning Elements – Meeting 1
- ✓ Best Management Practices – Meeting 2
- Implementation and Monitoring Strategy – Meeting 3
- Final Meeting 4

Meeting adjourned.
