Staff Present

1

Tyler Carpenter with Greater Egypt opened the meeting with introductions of staff and attendees. A review of the Solid Waste and Recycling Act occurred which detailed the purpose and requirements for both solid waste and recycling. Staff reviewed the grant application process and funding for the plan.

The planning process was detailed which included partnerships, information requests, plan narrative, GIS/mapping, and meetings. While Greater Egypt will take the planning lead for the project, the agency will act in conjunction with the Tri-County Solid Waste Advisory Committee, or other county-designated persons.

Participation in the plan will be needed by the communities in the county. Since some may not be able to attend meetings, a small questionnaire will be sent to allow them to be eligible for the plan. The Advisory Committee will be formed in the near future to provide input and progress plan development.

Plan narrative will be based on information retrieved and findings from potential analyses. Greater Egypt also plans to develop an interactive map to allow the public to easily locate waste/recycling centers and other information.

Along with Advisory Committee meetings, staff will hold at least one public meeting. This will likely include maps, figures, and a presentation.

Staff reviewed the timeline for the project. The goal is to complete the plan by December, 2023. Staff also detailed: public notice of planning start, advisory committee details, review and adoption, next steps and future planning.

Meeting adjourned.
