

Tri-County Solid Waste and Recycling Plan – Meeting Three Minutes

January 25, 2024 10:00AM

Virtual (Zoom)

In attendance

9

Staff Present

2

Tyler Carpenter (Greater Egypt) opened the meeting with introductions of staff and attendees. Staff reviewed the planning completed since the last meeting in August. County Coordinators have been established and the Advisory Committee consists of local communities within the Tri-County area.

Staff reviewed participation from communities in the Tri-County. Most municipalities need to send in the [Municipal Solid Waste and Recycling Questionnaire](#). From the returned forms, there are needs in communities for recycling and ward waste opportunities. Results will be detailed in the plan.

Staff reviewed the planning process and the plan outline. This will include an Intro and County background, Regional Plan Updates, Waste Generation and Composition, Materials Management, Public Education and Outreach, and Management Recommendations. Staff reviewed the current planning data and regional mapping tool.

Staff reviewed the public education and outreach component needed for the plan. This will include information and messaging, public meetings, waste pickup events and a residential survey during the planning process. Management measures were also discussed. These will be needed from the communities. Prior planning recommendations were presented. The timeline for the remaining planning timeline was presented.

Meeting adjourned.
