

Williamson County CWPP – Information Request Sheet

Please compile and return the following information to the best of your ability. Anything provided will improve the Plan and our ability to assess the County’s needs for future projects. Everything should be submitted to keleseybowe@greateregypt.org

You may use the form provided or send separate documents

1)What criteria does your jurisdiction currently use to define “wildfire”?

2)Jurisdiction Boundaries (if different from map below)

3)Current COADs and Mutual Aid Agreements you participate in

4)What is your average staff size for a shift?

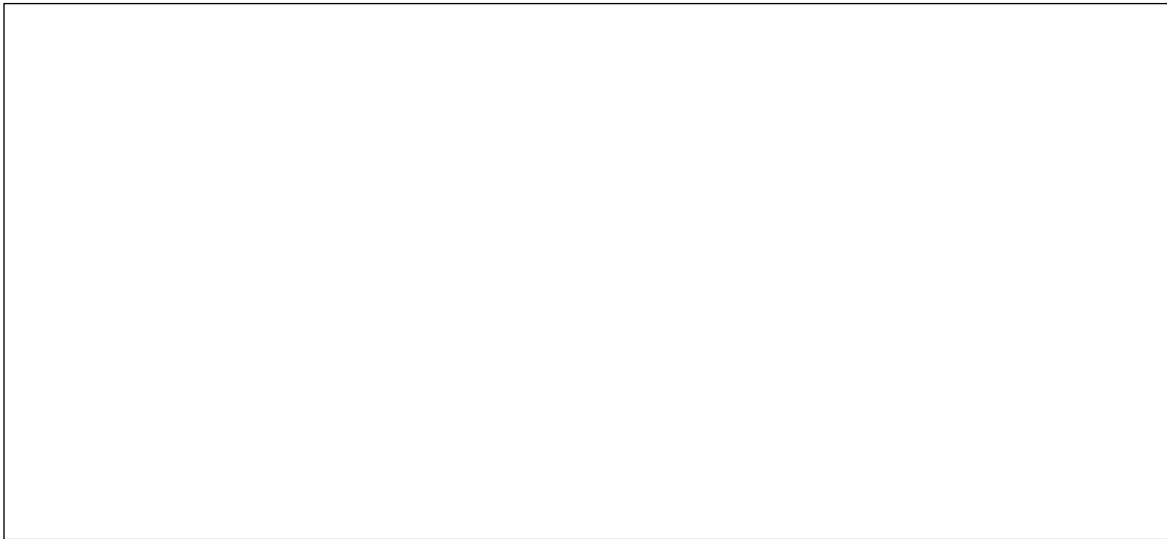

5)Wildfire History – as many years as you have accurate records of (forest service record is 1978-2021) If you have this as a GIS shapefile that is preferred, otherwise an excel sheet or other list will suffice.

- Date
- Location- (lat/long preferred)
- Total Acres burned
- Physical/monetary damage if reported

6)Current vehicle/ large equipment inventory; if you have agreements for emergency use of contractor/farm equipment please include those as well.

*this will likely go into a database for County EMA and fire jurisdictions to assess total assets and plan new purchases; does not have to go into the public document.

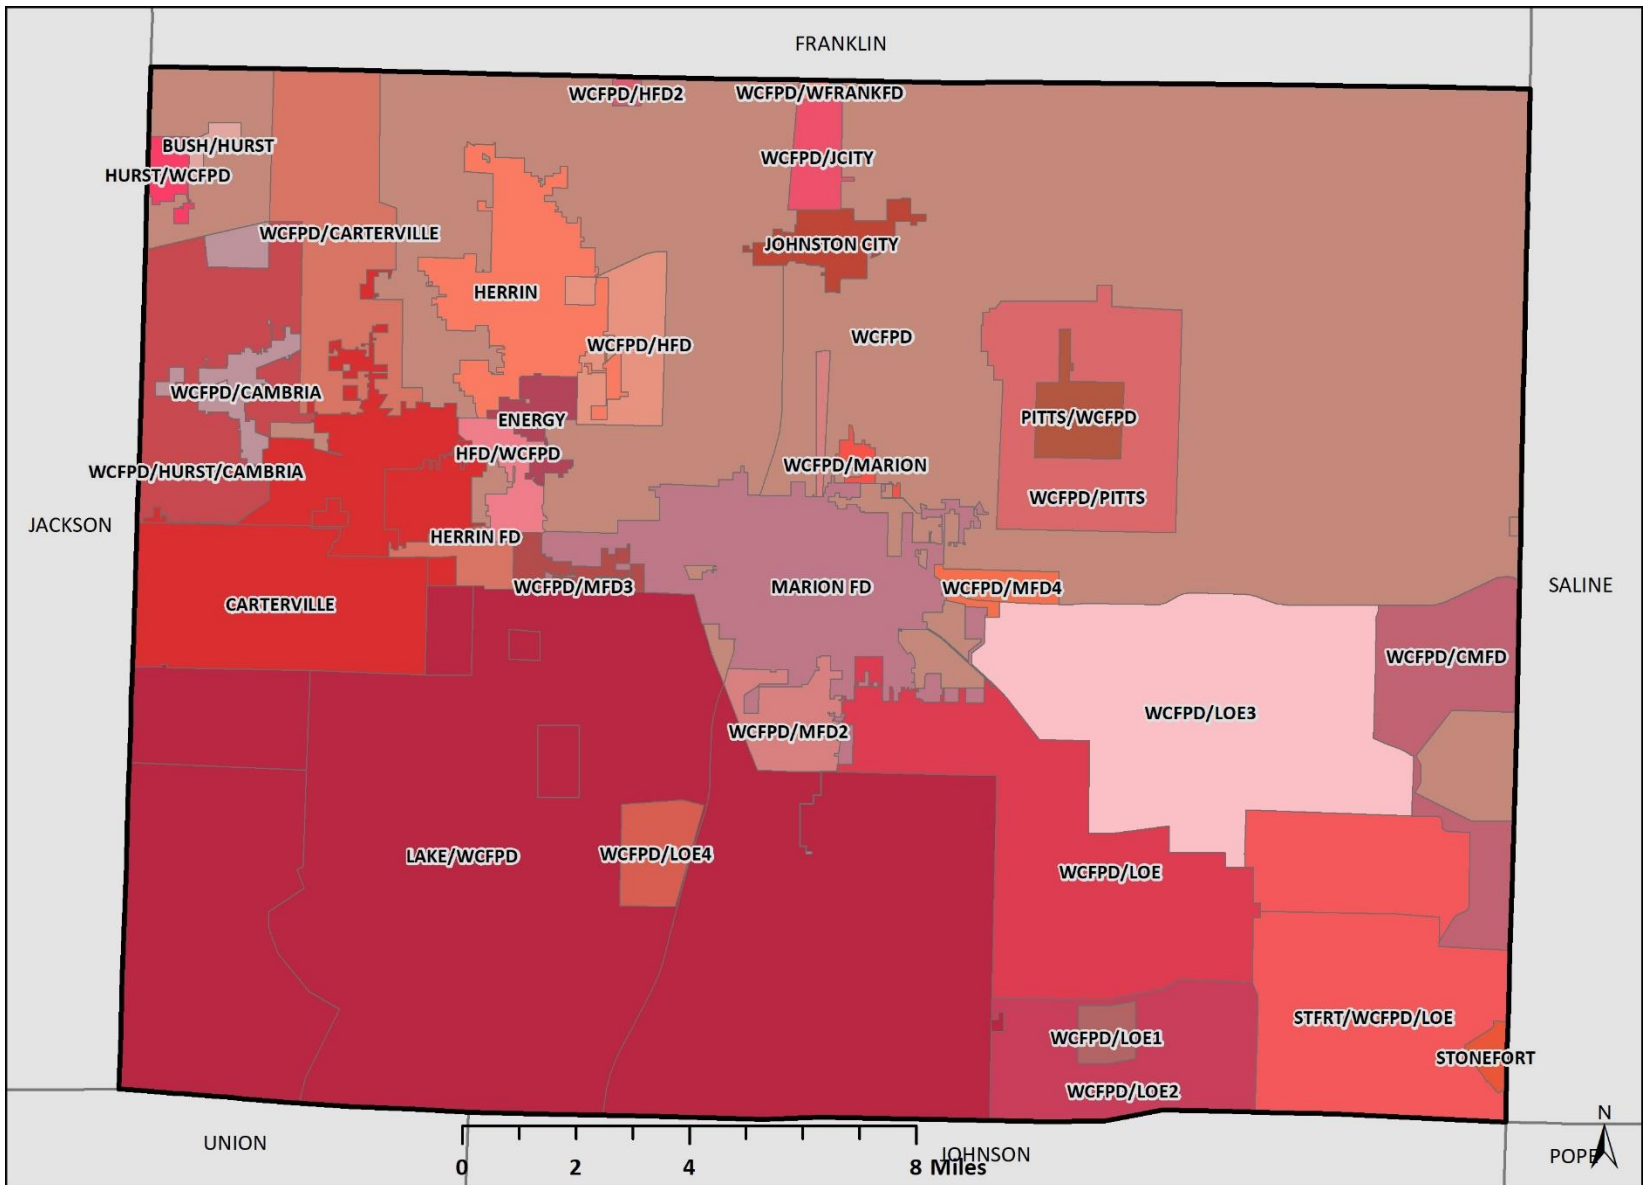

*Some of you already gave me this info for the MHMP, see list attached and notify me if anything is different

7)Water locations within your jurisdiction (hydrants/cisterns/ accessible ponds)

Provide shapefile if possible or a list of locations and type

*these will be important to have a complete map for the county and analyze priority locations for new water sources in rural areas

Williamson County, IL - Fire Protection Jurisdictions

WCFPD - Williamson County Fire Protection District
 MFD - Marion Fire Department
